

Introducing **QuinKill Max** Crabgrass and Weed Killer

from AGRISEL USA, INC.

**The Selective Herbicide for Landscapers,
Residential, Golf Courses and Parks for
Control of Crabgrass and Weeds**

1.5 DMA Herbicide

Multi Purpose Post-Emergent Herbicide

QuinKill Max is a post - emergent herbicide used for control of many broadleaf and grass weeds in residential lawns, parks, schools, athletic fields, golf courses, sod farms and more. QuinKill Max may be used as a spot treatment or broadcast spray over turfgrass to control crabgrass, foxtail, signalgrass, torpedograss, bindweed, clover, daisy, dandelion and many more listed weeds. QuinKill Max is absorbed by the foliage and roots and translocated throughout the plant for a thorough kill.

Key Product Benefits:

- * Excellent kill of unwanted grassy and broadleaf weeds in established grasses like bermudagrass, bluegrass, fescue, ryegrass and many more listed on label
- * EPA labeled for many different use areas including residential areas
- * For best results, combine with Agrisel MES Pro adjuvant
- * Economical to use at 1.5 fluid oz per 1000 sq feet or 3 tablespoons per gallon
- * Conveniently packaged in 2x0.5 gallons, 12x1 quarts and 12x1 pints
